Gombe State Water Board

This agency is responsible for water supply regulation, distribution, and water quality management in Gombe State.

Core Business Regulatory Processes:

1. Water Supply Licensing and Regulation

- i. Issuance of permits for borehole drilling and private water supply services.
- ii. Regulation of water service providers.
- iii. Compliance monitoring for water infrastructure projects.

2. Water Quality Monitoring and Compliance

- i. Enforcement of standards for potable water safety.
- ii. Supervision of water treatment processes.
- iii. Testing and certification of drinking water sources.

3. Billing and Tariff Regulation for Water Services

- i. Establishment and review of water usage tariffs.
- ii. Enforcement of metering policies.
- iii. Collection of water bills and revenue.

4. Guideline for Registration and Activities in the WASH Sector

- i. Licensing of WASH (Water, Sanitation, and Hygiene) service providers.
- ii. Supervision of sanitation and hygiene projects.
- iii. Regulation of community water and sanitation programs.

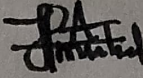

5. Infrastructure Development and Water Distribution Regulation

- i. Approval of public and private water supply projects.
- ii. Monitoring of pipeline installation and water distribution networks.

- iii. Supervision of water resource development initiatives.

6. Wastewater Management and Disposal Regulation

- i. Supervision of sewage and wastewater treatment facilities.
- ii. Issuance of effluent discharge permits.
- iii. Regulation of industrial wastewater disposal.
